

Draft - Site Specific Bond Project List

Revised 7/3/2008

Adams Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Alcott Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Angier Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Audubon Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Baker Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Balboa Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Barnard Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Bay Park Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Bayview Terrace Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Benchley/Weinberger Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Bethune Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Bird Rock Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Birney Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Boone Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Brooklyn Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Burbank Elementary

Draft - Site Specific Bond Project List

Revised 7/3/2008

Cabrillo Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Cadman Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Carson Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Carver Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Central Elementary

Major Building Systems Repair / Replacement

- Repair/replace inadequate temporary classrooms, school buildings or sites w/permanent, cost-effective permanent construction

Chavez Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Cherokee Point Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Chesterton Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Chollas/Mead Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Clay Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Crown Point Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Cubberley Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Curie Elementary

School Improvements to Support Student Health, Safety & Security

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Dailard Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Dewey Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Dingeman Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Doyle Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

E.B. Scripps Elementary

School Improvements to Support Student Health, Safety & Security

- Retrofit/install classroom heating ventilation and air-conditioning systems

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Edison Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair / restore classroom building interiors, exteriors, finishes and fixtures

Emerson/Bandini Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Encanto Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Join with the City of San Diego to co-fund joint use playfields
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Ericson Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Euclid Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Field Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Fletcher Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Florence Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Foster Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Franklin Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Freese Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Fulton Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Gage Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Join with the City of San Diego to co-fund joint use playfields
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Garfield Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Grant Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Green Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hage Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hamilton Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hancock Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hardy Elementary

Draft - Site Specific Bond Project List

Revised 7/3/2008

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hawthorne Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Hearst Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas

Holmes Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Horton Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

Draft - Site Specific Bond Project List

Revised 7/3/2008

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Ibarra Elementary

School Improvements to Support Student Health, Safety & Security

- Retrofit/install classroom heating ventilation and air-conditioning systems

Jefferson Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit or build classrooms / specialized facilities / playfield and school site improvements

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Jerabek Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Johnson Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Repair/Replace aging and obsolete portable classrooms
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Jones Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Joyner Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Juarez Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Kimbrough Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Lee Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Linda Vista Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Lindbergh Schweitzer Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Logan Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Loma Portal Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Marshall Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair/Replace aging and obsolete portable classrooms

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Marvin Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas

- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Mason Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

McKinley Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Miller Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Miramar Ranch Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Normal Heights Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Draft - Site Specific Bond Project List

Revised 7/3/2008

North park Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair / restore classroom building interiors, exteriors, finishes and fixtures

Nye Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair / restore classroom building interiors, exteriors, finishes and fixtures

Oak Park Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit or build classrooms / specialized facilities / playfield and school site improvements

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Ocean Beach Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Pacific Beach Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Paradise Hills Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Penn Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Perkins Elementary / Middle

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Perry Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Porter Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Rodriguez Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Rolando Park Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Rosa Parks Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair / restore classroom building interiors, exteriors, finishes and fixtures

Ross Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Draft - Site Specific Bond Project List

Revised 7/3/2008

Rowan Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Sandburg Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Sequoia Elementary

School Improvements to Support Student Health, Safety & Security

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Sessions Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Torrey Pines Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Valencia Park Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Vista Grande Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Walker Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Washington Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Webster Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Wegeforth Elementary

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Whitman Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

Zamorano Elementary

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a wireless network (WiFi) in every classroom
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls

New Downtown Elementary School Campus

Accommodating Student Enrollment

- Provide matching funds to plan/construct classrooms/schools as needed for enrollment growth

New Miramar Area Elementary Schools

Accommodating Student Enrollment

- Provide matching funds to plan/construct classrooms/schools as needed for enrollment growth

Site Discretionary Funds

Each elementary, middle, high school, alternative education school, including charter schools may allocate \$150 per student of bond proceeds, as ("site discretionary funds") to be spent on qualified, permitted projects listed this Part One Bond Project List

Bell Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Challenger Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Clark Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Correia Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Innovation Middle School at Mc Dowell Site

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

Draft - Site Specific Bond Project List

Revised 7/3/2008

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Dana Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

DePortola Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Farb Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Creative Media and Performing Arts Middle at Kroc Site

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit or build classrooms / specialized facilities / playfield and school site improvements

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Lewis Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Mann Middle School

Projects to Improve School Accessibility, Code Compliance Upgrades

- Meet new, stringent health standards by renovating kitchens and food service areas

Major Building Systems Repair / Replacement

- Repair/replace inadequate temporary classrooms, school buildings or sites w/permanent, cost-effective permanent construction

Marshall Middle School

School Improvements to Support Student Learning and Instruction

Marston Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Join with the City of San Diego to co-fund joint use playfields
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Montgomery Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Muirlands Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Pacific Beach Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Meet new, stringent health standards by renovating kitchens and food service areas

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Pershing Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Roosevelt / Balboa Park Program Middle School

School Improvements to Support Student Health, Safety & Security

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Standley Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Taft Middle School

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Wangenheim Middle School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Wilson Middle School

Major Building Systems Repair / Replacement

- Repair/replace inadequate temporary classrooms, school buildings or sites w/permanent, cost-effective permanent construction

Site Discretionary Funds

Each elementary, middle, high school, alternative education school, including charter schools may allocate \$150 per student of bond proceeds, as ("site discretionary funds") to be spent on qualified, permitted projects listed this Part One Bond Project List

Clairemont High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Crawford High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair/replace inadequate temporary classrooms, school buildings or sites w/permanent, cost-effective permanent construction
- Repair / replace inefficient, outdated heating and ventilation systems

Henry High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Hoover High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Kearny High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

La Jolla High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Draft - Site Specific Bond Project List

Revised 7/3/2008

Lincoln High School

School Improvements to Support Student Learning and Instruction

- Retrofit facilities to improve specialized high school instruction

Madison High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Mira Mesa High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Mission Bay High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Morse High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Point Loma High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction
- Retrofit and build classrooms, labs and facilities to improve specialized high school instruction

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

San Diego High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Scripps Ranch High School

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

Draft - Site Specific Bond Project List

Revised 7/3/2008

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Serra High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

University City High School

School Improvements to Support Student Health, Safety & Security

- Replace obsolete fire alarms, including emergency communications systems
- Install security lighting and increase vandalism and intrusion safeguards
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus
- Join with the City of San Diego to co-fund joint use playfields

Draft - Site Specific Bond Project List

Revised 7/3/2008

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair and renovate aging bleachers and fields to improve safety and disabled access
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Alternative Learning for Behavior and Attitude

School Improvements to Support Student Health, Safety & Security

- Eliminate unsafe student drop-off/pickup-areas and improve vehicular circulation
- Improve pedestrian safety on school sidewalks and in parking areas

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Retrofit and build classrooms, labs and facilities to improve specialized high school instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Site Discretionary Funds

Each elementary, middle, high school, alternative education school, including charter schools may allocate \$150 per student of bond proceeds, as ("site discretionary funds") to be spent on qualified, permitted projects listed this Part One Bond Project List

Draft - Site Specific Bond Project List

Revised 7/3/2008

Del Sol Academy

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Garfield High

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability
- Retrofit and build classrooms, labs and specialized facilities to increase career, vocational and technology instruction

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

- Repair / replace inefficient, outdated heating and ventilation systems

Keiller Leadership Academy

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Renovate kitchens and food service areas to increase efficiency to provide healthier menus

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Repair/Replace aging and obsolete portable classrooms
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Brooklyn - Einstein Academy

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Gompers West - Gompers Charter Middle

School Improvements to Support Student Health, Safety & Security

- Meet increased earthquake/seismic standards in pre-1976 concrete or masonry school buildings
- Retrofit/install classroom heating ventilation and air-conditioning systems
- Join with the City of San Diego to co-fund joint use playfields

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Harriett Tubman Village

School Improvements to Support Student Health, Safety & Security

- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

King/Chavez Academies

School Improvements to Support Student Health, Safety & Security

- Install security lighting and increase vandalism and intrusion safeguards

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Memorial Academy of Learning and Technology, King/Chavez School of Excellence

School Improvements to Support Student Health, Safety & Security

- Remove / abate asbestos, mold, or other potentially hazardous materials

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
- Technology upgrades that include providing every classroom with state-of-the-art audiovisual and projection capability

Draft - Site Specific Bond Project List

Revised 7/3/2008

Major Building Systems Repair / Replacement

- Repair and replace deteriorating plumbing and sewer systems
- Repair / replace frayed or aging wiring and upgrade electrical systems to classrooms and campuses for technology and WiFi
- Repair / restore classroom building interiors, exteriors, finishes and fixtures
- Repair foundations, ramps, stairs, floors and walls
- Repair / replace inefficient, outdated heating and ventilation systems

Cleveland - Momentum

School Improvements to Support Student Health, Safety & Security

- Retrofit/install classroom heating ventilation and air-conditioning systems

Projects to Improve School Accessibility, Code Compliance Upgrades

- Repair and renovate student restrooms
- Meet new, stringent health standards by renovating kitchens and food service areas
- Improve accessibility to classrooms, labs and other school facilities in order to comply with Americans with Disabilities Act (ADA)

School Improvements to Support Student Learning and Instruction

- Install a campus wide wireless network (WiFi)
