Lee,

On the HVAC IDIQ's are you releasing retention for each school or are you forcing the contractor to wait until the entire region is complete?

Andy.

Say Andy,

We (Neal Electric too) are finding that as we finish single schools under these contracts that the school district will not release retention on the those schools that have been turned over and closeout completed.

This seems unfair given the owner has full beneficial use for several months while we go on with other schools in the contract.

Anyone you can ask about this issue?
